

A photograph of two women in profile, facing each other and smiling warmly. The woman on the left has dark hair styled in a bun and is wearing a black and white striped long-sleeved shirt. The woman on the right has long, straight brown hair and is wearing a yellow sweater. They are positioned in front of a large window that lets in bright, natural light, creating a soft glow around them. The background is slightly blurred, showing an indoor setting with architectural elements.

ROY CASTLE LUNG CANCER FOUNDATION

STILL HERE

**THERE IS LIFE
AFTER LUNG CANCER.**

Caught early, lung cancer can be cured.
New treatments also mean more people are
living well with lung cancer for longer.

Don't let the pandemic stop you or your loved one from
being diagnosed. Contact your GP if you are experiencing
any potential lung cancer symptoms, including:

- A persistent cough
- Breathlessness
- Repeat chest infections
- Persistent tiredness or lack of energy
- An ache or pain when breathing or coughing
- Coughing up blood or blood in your phlegm
- Lack of appetite or unexplained weight loss
- Chest or shoulder pain
- A hoarse voice
- Wheezing
- Difficulty swallowing
- Swelling in your face or neck
- Finger clubbing.
